Orlova, T. I.
OSCILLOGRAPHIC METHOD OF MEASURING THE
RATE OF MOTION OF A METAL IN A CASTING
MOLD. 9 Dec 60 [10]p. (8 figs. omitted). FTS 9945/1.
Order from IC or SLA mi\$1.80, pb\$1.80 61-19429

Rough draft trans. of Lateynoye Proizvodstvo (USSR)
1954, no. 7, p. 25-27

The oscillographic method was employed for measuring the initial rate of motion of Al- and Zn-base alloys in castings (the pouring temperature was sufficient to warrant the flow of the metal in the mold up to the point of crystallization) and for measuring the rate of flow of the metal in the range of precrystallization temperatures for the purpose of establishing the relationship between the fluidity and the rate of flow of the molten mass. The values of the rate of flow measured under uniform conditions of the experiment coincided. Good conformity of the results was observed during repeated pourings.
